

OTR Tire Sealant

Environmentally Friendly Product

Faster OTR Tire and Rim removal = reduced downtime, labor and expenses

Because the seating of O-rings is not always consistent, this fibrous liquid product will maintain air pressure in the tire by stopping rim leaks and vent leaks

Our commitment to customers and product excellence is backed by years of research and manufacturing for the OTR Industry.

- Orders shipped within 24 hours
- Competitive pricing and payment terms
- Custom – engineered products available for hard to solve problems

Available in:

- 5 gallon buckets, part number 5BTS
- 6 gallon buckets, part number 6BTS
- 55 gallon drums, part number 55BTS
- 275 gallon totes, part number 275BTS

Additional Benefits:

- Seals punctures of up ¼"
- Lubricates rims and tire for quick and easy removal.
- Eliminates rust on rims
- Water based for easy clean-out
- KTB will not freeze
- Tires run cooler with KTB

Our products are easy to install:
Pour into the tire prior to mounting.
Wipe KTB on both the tire bead and wheel to lubricate. Continue the mounting process.

If the tire is mounted, install through the valve after removing the valve core using our sealant pump.

Pumps are available for order.
